The effective leadership is visible in various institutional practices such as decentralization and participative management.

Decentralization

Decentralization in the institute is planning a very important role in deciding and implementing the student centric program and activities.

The academic activities are delegated as per the hierarchy of organization.

The college has several committees/sub committees and duly represented by faculty industry experts, alumni, parents and students to monitor and guide the academic and administrative activities.

The decentralized governance model is obvious in every area, as each department/faculty functions as an individual sub-unit, in organizing and implementing the student-centric programs and activities.

In the decentralized governance system, Management and Principal of institute are empowered to take important decision of all academic activities in the Institution.

Heads of the Departments are authorized to take decision at their department level. Faculty members take the academic lead to drive the activities to implement the policies. Coordinators from various functional committees work with teams of members to achieve the prescribed objectives.

- All the departments together conduct Graduation day every year organized by faculty, students and other Volunteers.
- Decentralization at various levels such as HOD, class committee chairperson, class coordinator, lab in-charges, faculty counsellor.
